

## GENERAL INSTRUCTIONS

This product will generate heat and become unstable if it comes into contact with small amounts of moisture. To avoid hazardous situations please handle this product carefully and observe the following:

- a. Ensure that maximum agitation is running prior to adding product to spray tank.
- b. Ensure that spray tank is at least half full of water before adding product to tank.
- c. Ensure that the filter basket is removed before adding through top port of tank.
- d. Ensure that the required quantity of product is measured out using a dry measuring vessel.
- e. Ensure that product is promptly resealed after required quantity is measured out.

## STORAGE AND DISPOSAL

WHEN STORING: Always store in closed, original container in a cool, well ventilated area out of direct sunlight. Triple or preferably pressure rinse containers before disposal, adding rinsing to wash tub. Do not dispose of undiluted chemicals on site. If recycling, replace lid and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and bury empty containers in a local authority landfill. If no landfill is available, bury the containers below 500 mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers should not be burnt.

## SAFETY DIRECTIONS

CORROSIVE. Product is poisonous if swallowed. The product is alkaline. Attacks skin and eyes. May produce severe burns. Will irritate the throat. Do not inhale vapour. Ensure adequate ventilation when using. Avoid contact with skin, eyes and clothing. When preparing and using solution wear elbow length neoprene gloves, face shield or goggles. Do not mix with hot water. Do not mix with other chemicals. Do not mix with different types

of chlorinating chemicals. Mix with water only. If product or solution is on skin, immediately wash area with soap and water. In case of spillage, flush with large quantities of water. Wash hands after use. After each day's use wash gloves, face shield or goggles and contaminated clothing.

## FIRST AID

If poisoning occurs, contact doctor or Poisonous Information Centre on 131 126. If swallowed DO NOT induce vomiting. Give glass of water. If skin contact occurs, remove contaminated clothing and wash skin thoroughly. If in eyes, hold eyes open, flood with water for at least 15 minutes and see a doctor.

## CONDITIONS OF SALE

Apparent shall not be liable for any loss, injury, damage or death, whether consequential or otherwise whatsoever or howsoever arising whether through negligence or otherwise in connection with the sale, supply, use or application of this product. The supply of this product is on the express condition that the purchaser does not rely on Apparent's skill or judgment in purchasing for his own use and every person dealing with this product does so at his own risk absolutely. No representative of Apparent has any authority to add to or alter these conditions.

**Directions for Use**

<b>Chemical Type</b>
Non-Persistent Chemicals
Sulfonyleurea Herbicides (including: Chlorsulfuron, Metsulfuron, Triasulfuron, Sulfometuron, Halosulfuron, Bensulfuron, Iodosulfuron, Sufosulfuron, Rimsulfuron, Thifensulfuron, Mesosulfuron)
Phenoxy Herbicides (including: 2,4-D Amine, 2,4-D Ester, Picloram, Triclopyr, Dicamba, MCPA)

<b>Situation</b>	<b>Use Rate</b>
Spray tanks, hoses and all other spray equipment	100 g per 100 L
Nozzles and screens/filters	10 g per 10 L
Stain and scale removal from spray equipment	40 g per 10 L
Spray tanks, hoses, lines and all associated spray equipment	150 - 250 g per 100 L Please note: 1. Use lower rate when product is used 1 - 12 months from D.O.M. 2. Use higher rate when product is used 13 - 24 months from D.O.M.
Nozzles and screens/filters	25 g per 10 L
Stain and scale removal from spray equipment	40 g per 10 L
Spray tanks, hoses, lines and all associated spray equipment	250 g per 100 L
Nozzles and screens/filters	25 g per 10 L
Stain and scale removal from spray equipment	40 g per 10 L

<b>Procedure</b>
<p>Step 1. Clean spray equipment immediately after spraying is completed.</p> <p>Step 2. Hose down outside of the tank, otherwise herbicide adhering to the outside could contaminate the unit again after it has been cleaned.</p> <p>Step 3. Drain the tank, then flush tank, boom and hoses with clean water for a minimum of 10 minutes.</p> <p>Step 4. Half fill the tank with clean water and begin agitation.</p> <p>Step 5. Remove filter basket in top of tank.</p> <p>Step 6. Measure out the required amount of Apparent Boom Kaboom! either by using the measuring cup provided which holds 50 g when full or by using a dry clean measuring jug. Note that 1 g of this product equates approximately to 1 mL by volume. For more precise measurement use a set of electronic scales.</p> <p>Step 7. Replace lid on product firmly immediately after measurement to ensure that product is kept dry at all times.</p> <p>Step 8. Slowly add Apparent Boom Kaboom! through top port of tank.</p> <p>Step 9. Replace the filter basket in tip of tank and fill the tank water. Agitate and circulate the solution through all lines. Run the sprayer to fill the boom.</p> <p>Step 10. Agitate vigorously for 15 minutes and recirculate.</p> <p>Step 11. Use hand lance or return hose to clean the top of tank and around the filter basket. Care should be taken to wash out any indentations or ledges in the tank where herbicide could be deposited.</p> <p>Step 12. Open spray booms and spray out.</p> <p>Step 13. Repeat steps 4 - 12 above.</p> <p>Step 14. When sprayer is to be re-used immediately. The following procedure must be used to ensure that any excess foam containing chlorine residue is completely removed from the tank. If this procedure is ignored then the next chemical batch may be contaminated by residual chlorine in the foam at the bottom of the tank.</p> <p>(a) Half-fill the tank with water.</p> <p>(b) Add 10 mL/100 L of a de-foaming agent such Apparent Let's Go Anti-Foam.</p> <p>(c) Fill the remainder of the tank with water.</p> <p>(d) Agitate for 5 minutes and recirculate before spraying out. If this procedure is carried out then there should be no further trace of the blue dye (contained in Apparent Boom Kaboom!) in the washing water.</p>
Remove and clean separately. Immerse in solution of Apparent Boom Kaboom! and allow to stand for 30 minutes. Remove any residue with a wire brush. Rinse in clean water before re-connection to the boom
Mix Apparent Boom Kaboom! in a bucket and scrub stained areas with a stiff brush. Wear rubber gloves.
<p>Step 1 - 11. Use same procedure as outlined for non-persistent chemicals above.</p> <p>Step 12. Let the unit stand for 15 - 30 minutes</p> <p>Step 13. Open spray booms and spray out.</p> <p>Step 14. Repeat steps 1 - 13.</p> <p>Step 15. When sprayer is to be re-used immediately, use the same procedure as outlined for non-persistent chemicals above.</p>
Use the same procedure as outlined for non-persistent chemicals above.
Use the same procedure as outlined for non-persistent chemicals above.
<p>Step 1 - 11. Use same procedure as outlined for non-persistent chemicals above.</p> <p>Step 12. Let the unit stand for 4 - 6 hours</p> <p>Step 13. Open spray booms and spray out.</p> <p>Step 14. Repeat steps 1 - 13. The solution should be left to soak overnight for an especially thorough cleaning.</p>
Use the same procedure as outlined for non-persistent chemicals above.
Use the same procedure as outlined for non-persistent chemicals above.
