straightcurve®

Specifications

240mm Flexline[™] LENGTH 2160mm | TOP THICKNESS 8mm

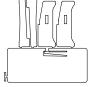

Weathering Steel

Steel plate thickness 2mm

SOLD AS SET INCLUDING

- ⊘ 1 x Joining set (2 x wedge, 2 x slider, 1 x joint bracket)
- ⊘ 5 x galvanised spikes, 300mm long
- ⊘ 2 x bracing ribs (attached to edge)

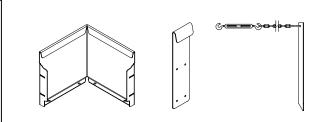

ADDITIONAL ACCESSORIES

REQUIRED

Small anchor post (2 x Tek screws 12G x 16mm)

OPTIONAL

- ✓ Corner piece (arm lengths: 255mm)
- Ø Joining sleeve (6 x Tek screws 12G x 16mm)
- ✓ Universal bracing set (turnbuckle/chain/stake)

All fixings and accessories not to scale. All accessories are available in weathering and galvanised steel finish.

Installation guide 240mm Flexline[™]

PREPARATIONS

Mark line and level or trench as required ready for install. Note: This edge allows gentle sloping

CORNERS

Pre-made corners* are available for purchase, these include the standard joining set. These can be opened or closed further with forceful bending to achieve different angle corners. You can also choose to make your own. To do this score a line down the back of the edge and create a sufficient opening (5-7mm) in the folded lip at the top and cut out one foot tab at the bottom with your angle grinder to allow space for bending. Bend strongly by hand; using a block of wood close to the fold to form bend against.

STAKING THE EDGE

Anchor posts are driven in as a stake behind the edge adjacent to a bracing rib, which is then screwed onto with screws. It is recommended to use two of these per edge. If you're making a tight 1.37m diameter ring with two lengths, it is self supporting and doesn't need any anchor posts.

HARD SURFACE FIXING

If you need to secure the edge to hard surfaces, the universal bracing set can be used. To secure to a concrete surface remove stake and use bolt down method instead (purchase bolts separately).

JOINING SLEEVES

Shortening a length is sometimes a requirement. The Joining sleeve is used to connect the two edges when this occurs. These are fixed to the panel front with screws through the auide holes in the sleeve.

TIP

The pre-attached bracing ribs can be moved. Knock sideways at top to dislodge then pop out from bottom and do opposite to re insert them where needed.

STANDARD RING SIZES

	-	
Connecting edge lengths	2	1.37m
makes standard ring sizes, use	3	2.06m
join sleeve for non-standard	4	2.75m
diameters greater than 1.5m	5	3.44m
-		

Lengths

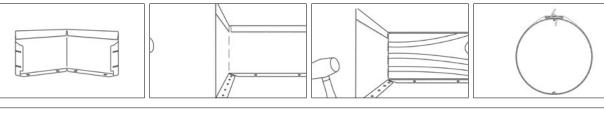

Diameter

STEP 1 - JOIN	STEP 2 - FLEX	STEP 3 - PEG	STEP 4A - STAKE (OR)	STEP 4B - BRACE
