Site Safety Made Simple

# MESHMATE® BaseMate™

Australian made from recycled plastic & designed to eliminate the need to perform time consuming, underground service locations & dig permits. BaseMate offers multiple engagements from a non ground penetrating pickets to a relocatable road marker. That can illuminate for night works when accompanied with "Illuminate™" solar powered caps. This clever little product gives you genuine time, cost & labour saving benefits. Incredibly fast & easy to use, integrates with your existing bollard rubber weights for use on any hard surface. Let us show you why, you should use our cost effective, sustainable product for your next project.

-  Fast setup
-  Recycled plastic materials
-  Night-time Illumination
-  Easy to store and transport
-  Multiple setup options
-  Highly cost effective

**Every purchase of MeshMate products directly increases job opportunities for Indigenous youth in Western Australia!**
